AMBERG
INFRAESTRUCTURAS

Amberg Infraestructuras SA is a company part of the swiss Amberg Group. During more than 50 years, the Amberg Group has developed solutions for underground road, metro, railroad and hydroelectric infrastructures. We design and assist on the construction of tunnels, caverns, galleries and shafts in world relevant projects.

We are looking for:

BIM Modeller for Civil Engineering

Your tasks
As part of the BIM modelling team, you will work on several Underground Engineering Projects.

Your profile
BIM Modeller with at least five years of experience, at best on Civil Engineering (experience with tunnels will be valued). High level of English required. Any additional language will be valued (German, French, Italian).
Fluent on Revit/Dynamo. Skills with other software will be valued (Rhinoceros/Grasshopper, Autodesk Civil 3D, Recap, Navisworks, Infraworks, etc.).

Your office
Your office will be the one from Amberg Infraestructuras SA, on the town of Alcobendas in Madrid, Spain. Short periods of work on another of the offices of our group, or on project offices can be arranged between the candidate and the company.

Contract
Incorporation to the position is immediate. The contract will be permanent, or will have a duration no shorter than two years.

If you consider yourself to be in a position that fits the skillset required, and you are interested on the position, please contact us. Send your complete CV with the Reference "BIM Modeller" as Subject to job@amberg.es.
